

# **ADEPT** SHORELINE PERMIT MANAGEMENT

The New Standard for Shoreline Permit Management Operations

- Improves capacity to meet FERC requirements
- Reduces the time and resources needed for managing shoreline operations
- Significantly improves code compliance monitoring and reliability
- Custom tailored to fit unique operational and management needs
- Adept Enterprise is the only mature, proven and reliable product on the market

The Adept Enterprise Shoreline Permit Management software system is a Web-based, feature-rich solution designed for Hydropower Project Reservoirs licensed by the Federal Energy Regulatory Commission (FERC), Corporate Real Estate Divisions, Water Districts and the U.S. Army Corps Lake and Recreation operations.

Adept's Shoreline Permit system consolidates your shoreline management operations and workflow processes, providing convenient, centralized access to shoreline use permit data and seamless integration with your existing GIS mapping systems.

Our system ensures that federally licensed hydroelectric projects accurately comply with their license

and reporting requirements. The Adept system efficiently automates the shoreline management process and supports your organization's changing requirements. Adept offers the only mature Shoreline Permit software system for managing project license requirements, that ensures consistency with your Shoreline Management Plan (SMP).

Adept's Shoreline Management system tools provide for the effortless issuance, transfer and tracking of Permits and Licenses, parcel related transaction history, and for the tracking of non-compliance violations for encroachment issues.

Inspectors and shoreline staff can easily process boat dock and seawall applications, taking advantage of Adept's robust record search capabilities to track properties by tax parcel number

or unique record identifier. Adept's enhanced workflow system automates each task, accelerating the review and inspection approval process. This innovation enables the coordination of activities between multiple departments and allows field inspectors to track and update tasks on mobile devices and tablet PCs.

Adept offers end to end customization to meet the unique and growing needs of your shoreline operations.

**“We have a long term relationship with Adept and they care about our business as much as we do. They really know how to meet our changing requirements.”**

— Jeff Green,  
*Ameren Supervisor  
Shoreline Management  
Real Estate Department*

# **ADEPT** SHORELINE PERMIT MANAGEMENT

- Reduces Permit Processing Time and Workload
- Improves Record Keeping Accuracy
- Enhances Communication between Departments
- Increases Productivity
- Hosted Option Eliminates IT Management Concerns

## **Generate and Track Shoreline Permits**

The Adept Shoreline system automates the issuance of permits and licenses, in compliance with your organization's SMP guidelines. The system dramatically reduces paperwork, easily tracking existing and approved permits. Each record in the system contains related staff comments, alerts, uploaded images, scanned data and correspondence. All permits are accessible by multiple departments from a centralized source.

## **Automate the Permit Process**

Shoreline Managers leverage the Adept system to automate shoreline processes, increasing productivity and reducing errors and costs. Key features of the Adept system are the direct link with the County Assessor parcel data and Dynamic Workflow Automation, allowing multiple users to track and manage assigned tasks and permit timelines. Property owners and staff are instantly informed of changes in permit and violation status. Adept also offers optional productivity tools that can further enhance and streamline your operations.

## **Reporting Tools**

Adept's powerful reporting tool is fully integrated with the Adept system, providing enhanced analysis of appropriate shoreline use, payment transactions and violation history for legal departments. The reporting tool queries for information on project status and data can be auto populated for mass mailings. Report creation is simple and conveniently exported to widely used formats.

## **Consolidate and Integrate Legacy Data**

The Adept system consolidates multiple databases in one manageable location, prioritizing workload and reducing costs by eliminating redundant processes. Types of data consolidated in the Adept system include Legacy data, Tax Assessor, Address, Parcel and Owner information, Certified Dock Builders and scanned Property Owner Permit Applications and all related correspondence.

## **GIS Data and Map Integration**

Existing GIS systems interface directly with the Adept Shoreline system, spatially correlating data to unique identifiers with access to real-time updates. Adept's GIS tool captures and displays parcel modifications on map layers. Visual maps of parcel and facility information such as property boundaries, contours, historic properties, lake mile markers and county tax property data are linked to each permit and violation record.

## **The Adept Secure Advantage**

Security is a primary consideration in designing Adept Technologies' products and is an integral part of Adept software from source code to database connectivity and structure. Our revolutionary security technology is never compromised, ensuring that sensitive data remains safe and end users are protected.

By offering a mature, FERC-compliant solution that provides workflow automation, centralized data access, GIS mapping integration and secure Web access, Adept Technologies is uniquely positioned to meet to the current and future needs of your Shoreline Management operations.
